-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: D1 in figures 6, 7 and 8 is not mentioned in the specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claim 2 is objected to because of the following informalities: on line 2, before "front", "the" should be changed to --a--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2615

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-7 rejected under 35 U.S.C. 102(b) as being anticipated by Nakamura (U.S. patent 5,263,093).

Regarding claims 1, 3 and 7, Nakamura teaches a microphone that comprises a diaphragm (20, 20a, 20b) with a first surface and a second surface, a first sound inlet in a first opening (10, 14, 19a, 25) and a second sound inlet in a second opening (7, 13, 17). As shown in figure 1, the first sound inlet strikes the second surface of the diaphragm, and an acoustic damping (11) is constructed at the second sound inlet for damping the sound of the second sound inlet as claimed (also see col. 5, lines 5-14). Nakamura further shows the first sound inlet that is disposed behind the diaphragm (20) and the second sound inlet that is disposed in front of the diaphragm (figure 1).

Regarding claim 2, the microphone of Nakamura comprises a housing into which an opening is laterally provided (figure 1).

Regarding claim 4, Nakamura teaches a damping element is constructed in the diaphragm and in the second opening (11, 24, 26, see figure 1 and col. 7, lines 4-9 and lines 57-60).

Regarding claims 5-6, Nakamura teaches the second sound inlet (7, 13, 17) is constructed with an acoustic damping element as claimed (figure 1, and see col. 5, lines 5-14 and col. 6, lines 49-68 through col. 7, lines 1-9).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2615

Nakagawa (U.S. patent 4,281,222) teaches a miniaturized unidirectional electret microphone

Foley (U.S. patent 4,288,663) teaches a noise canceling transmitter.
